

CURRENT BUS LOOP

Twenty-seven (27) busses line up in two loops, one on the inside and one on the outside of the existing looped driveway near the newer part of HMS.

A student might have to cross through three lines of busses before finding his/her correct bus.

With limited available space, busses do not have assigned parking spots.

Order of the busses' parking can change from one day to the next.

HMS staff are constantly checking under, in front of and behind busses to ensure that no students are in jeopardy before the busses are allowed to depart.
